Price Adjustments

Dear business partners,

we are pleased about having you for so many years as our customer.
Your satisfaction is our motivation to extend our cooperation.

However, the general market situation is also affecting our business and we are in a unique complex global economic situation for some time now. Keeping supply chains in operation is the highest priority in our daily business.

Some markets are affected by strong growing demands which leads to shortages of several core resources and forced us to accept higher costs for sourcing and logistic – especially for sea- and airfreight.

Being aware of our responsibility as your reliable partner, we have implemented several measures to cover the cost increase internally. However, the situation of the cost augmentation has escalated to an extent that it leaves us with no other choice than to ask you for your support for an absolutely essential price adaptation.

Beginning from Mai 1st 2021 we will adapt the price level of the Schauburg product portfolio as follows:

- | | |
|---|--------------|
| - EPDM, NBR, Silicone molded parts and similar: | 6,4 % |
| - Technical plastic components: | 4,9 % |
| - Hoses and hose assemblies: | 4,2 % |
| - Other products (preformed hoses, profiles, stamped parts, etching technology, etc.) | 5,6 % |

Nuremberg,
26.03.2021
